STRUCTURED VOICE & DATA CABLING

Lakewood Ranch Telecom's Cabling Division specializes in the design and installation of structured cabling for voice, data, video, and other connectivity solutions. Whether you require a single cable run or cabling for a new construction, or a major building rehabilitation or technology upgrade, Lakewood Ranch Telecom's cabling experts are ready with the optimal solution for your needs.

Whether your project requires voice, data, fiber, or other cable types, installing conduit, drilling through concrete walls and floors, we have the right personnel to do the job. Personnel are certified in the installation of Cat 3, Cat 5, Cat 5e, Cat 6, fiber and other cable environments.

Lakewood Ranch Telecom's Cable Design Engineers have many years of practical experience in the design of complex voice and data cable installations.

All work is warranted and is performed where applicable according to local building regulations.

- Each cable will be clearly identified at each end and tested prior to project completion.

Lakewood Ranch Telecom delivers performance and reliability in your network cabling that insures your business receives the trouble free flow of information it needs to work smarter and be more productive.
