## TELECOMMUNICATIONS

Lakewood Ranch Telecom is a leader in supplying full service telecommunications solutions across Southern Florida. We understand how critical your communications network is to your business operations and respond accordingly. Certified technicians are available to provide the services you need, when you need them.

Services include:

- Custom Design & Engineering
- Expert Installation & User Training
- System Relocation
- System Upgrade and Enhancement » Emergency Repair
- Remote Programming and Support
- Voice over Internet Protocol (VoIP) Applications
- Session Initiation Protocol (SIP) Multi-media Solutions
- Voice Mail & Unified Messaging Applications
- Marketing message and music on hold production, systems and installation

Lakewood Ranch Telecom provides quality telephone systems for any size business. Companies requiring a full set of voice communications features will appreciate the wide range of digital and programming capabilities of the Vertical phone systems featured by Lakewood Ranch Telecom. With a Vertical telephone system, you can select the right feature set for each job function.

For example, Vertical phone systems are available with sophisticated voice mail and call-forwarding functions. State-of-the-art marketing message capabilities are available as well. This is an excellent way to inform callers of new products, special pricing and company news.

Lakewood Ranch Telecom demonstrates its leadership by applying technology to make customers more efficient and to reduce their communications costs. We offer the latest in VoIP and Internet-based solutions to help customers maximize the return on their telecommunications investment. Lakewood Ranch Telecom professionals can also dial into customers' systems to make customer-authorized programming changes, modifications and repairs. Should an on site visit be required, we will dispatch a skilled, certified technician and will manage the service call to ensure response time commitments are met and to verify that customer requirements are properly implemented.
